Chapter 1 - Annotations and Review

Select text and press H to highlight it.
Use the note tool to add sticky comments to any page.
Ink drawing, rectangles, ellipses and stamps are available
from the annotation toolbar. Annotations persist locally
and can be exported as an XFDF review package.
The quarterly review workflow tracks status per comment.

Chapter 2 - Forms and Data

Open PDF fills AcroForm fields and saves the result as a standard PDF. Field values can be exported to FDF, XFDF or JSON for downstream systems.
Open form-sample.pdf to try interactive form filling.

Chapter 3 - Security and Signatures

AES-256 encryption, permission controls, watermarking and metadata stripping are provided through the security tools. Digital signature inspection lists certificate details for signed documents.
